

SPECIFICATION

Shrub/Tree Planting

All tree planting must be undertaken in accordance with methodologies described in BS8545:2014.

Soil for cultivating and planting must be moist, friable and not waterlogged.

Planting of trees & shrubs must be carried out between Late October - Late March.

Plants should be:
Helath, sturdy and undamaged.
Of good appearance.
Preferably of local provenance.
Free of pest & disease.
Root system?condition relevant part of BS3936 and balanced with branch system.
Species must be true to name.
Planted upright in a trench large enough to take the full spread of the roots. plants should be placed evenly throughout the hedgeline.

After planting water immediately, thoroughly and without damage or displacing plants or topsoil.

MAINTENANCE

Watering as necessary to ensure the continued thriving of all plants.

Weed control to be carried out by hand only to prevent damamge to the surrounding environment. the original planting trench area must be maintained as weed free to allow the hedge to establish.

Tree guards or rabbit spirals must be correctly installed and maintained as such. displaced guards must be refitted or replaced immediately.

Pruning if required must be carried out to good arboricultural or horticultural practices.
